

TeraForé Intelligel

a Natural Indoor Air Quality Solution

The list of its therapeutic properties is long - anti-infectious, antibiotic, antiseptic, antiviral, bactericidal, balsamic, expectorant, fungicide, immune-stimulant, insecticide, and stimulant.

Just the vapors alone of **TeraForé Intelligel Air Purifying Gel** cleans germs and mold in the indoor air environment. It is used to purify indoor air in homes, offices, cruise ships, and hotels. When used in a hospital room, it does not interfere with other treatment(s) for the patient.

TeraForé Intelligel Air Purifying Gel has been successfully used for the "sick building syndrome." When placed inside the air conditioning system, it protects office workers against the risks of legionella, immunological diseases, fatigue, headaches, colds, watery eyes, chronic coughs, and runny noses, resulting from breathing contaminated air. Similarly, it protects passengers on ships or airliners against sudden epidemics. During the flu season, it can be used to prevent the spread of germs in homes and offices. In addition, **TeraForé Intelligel Air Purifying Gel** is a natural deodorizer. Its vapors do not mask, but break down and eliminate musty or organic malodors.

Also last, but not least, **TeraForé Intelligel Air Purifying Gel** is penetrating, its vapors penetrate into porous materials, where

they provide lasting protection. The vapors saturate the air, spread by diffusion and chase biological pathogens into low ventilated corners and even into a sheetrock, ceiling, upholstery, and carpeting.

Synthetic air fresheners release harmful Volatile Organic Compounds (VOCs) - Research show that chemical compound (1,4-dichlorobenzene) found in many air fresheners, as well as toilet bowl cleaners, mothballs, and other deodorizing products, may be harmful to the lungs. Synthetic air fresheners can cause lung damage (published June 2006-National Institute of Health). Similar results of other studies, Asthma risk to small children rises as their home exposure to 1,4-DCB increases (study published in Thorax, 2005). Remarkably, 96% of Americans have detachable levels of 1,4-DCB in their blood.

It is because of information like this that we must switch to natural and safe products like **TeraForé Intelligel Air Purifying Gel**, by HealthWay.

TeraForé Intelligel Air Purifying Gel is made from the Melaleuca alternifolia tree and the Leptospermum petersonii tree components. They are 100% natural and safe and have been widely used as a natural antiseptic for over 70 years in Australia and is currently in use world wide.

Although TeraForé Intelligel is natural we recommend that you do not use it topically or administer orally.
